PROJECTS

JAN 2019 – DEC 2019

ANDROID MOBILE APPLICATION, PIZZA HUT

For my senior Informatics capstone project, I had the pleasure of working with 3 other students and Pizza Hut to develop an android application that would allow the user to live track their pizza delivery driver. As lead programmer, I used Android Studio to develop the application in Java while using XML for the front-end. Our application used Firebase to store the user and drivers data, along with creating communication between the user and driver. The application also included features such as: contacting the driver, viewing your order, estimated time of delivery and estimated driving route using Google API.

JAN 2019 – MAY 2019

UNITY EDUCATIONAL VIDEO GAME, ASU PREP DIGITAL

For my game development capstone, my team and I created an educational psychology game for an ASU online course. Our puzzle game was meant to teach students the basic types of psychology by allowing them to explore a variety of levels in a first-person scavenger hunt game. Because we used Unity, our project was written in C# and we used 3DS Max for our 3D models.

EDUCATION

AUG 2015 - DEC 2019

INFORMATICS & GAME DEVELOPMENT, ARIZONA STATE UNIVERSITY

Studied in understanding the development, usage and practices of programming along with collaborating to develop a product that meets certain requirements or purposes

JOB EXPERIENCE

JAN 2020 - CURRENT

PHARMACY TECHNICIAN, CVS PHARMACY

Responsible for maintaining pharmaceutical stock, entering prescription data, and providing compassionate customer service. Recently began overseeing all COVID-19 testing in the district by training new nurses

JUN 2016 – DEC 2016 | APR 2017 – FEB 2018 | MAY 2019 – JAN 2020

CASHIER | SUPERVISOR | OPERATIONS MANAGER, CVS PHARMACY

Went through many positions within CVS as I worked my way up the ladder. Each role came with more responsibility and ability to impact the stores performance. I strived to get these promotions because I cared about the role and wanted the stores I was in to succeed. I learned a lot of valuable things from each role, and think they have made me a stronger and more flexible worker.

SKILLS

- Proficient: Java, XML, HTML/CSS, WordPress, C#, Android Mobile Development
- Solid Understanding/Current Learning: REST, Angular, iOS, C++
- Fluent in Spanish
- Dependable and dedicated
- Motivated to learn and create
